The semi-finals heats of the 800 metres and the tryouts of the running high jump put the Americans in the position of practically owning the event. Six representatives of the United Stites qualifying in both. The 10,000 metres race was less satisfactory, but was not entirely disappointing. A disappointment of the day was the inability of Howard Drew of the Springfield High School to compute in the final of the 190 metres because of the strained ankle and the fadlure of the popular Italian champion Lunghi to get a place in the final of the 800.

Stockholm, Swoden, July 7.—The sumes were started today once more with a sermen, a prayer and a bymn, whom the Stadium was opened at 9 o'clock. The weather was hot and clear and greatly to the liking of both American visitors and competitors. The seats even at these early hour were half filled with enthesiasta, among whom were many women. New York, July 7.—As might have been expected, and doubtless was by every one familiar with the stock mar-ket, duliness marked the period of trading during the half day session Saturday. There was an evidence of strength after the opening which indi-cated that a few bulls were left in the ring, thoppin disabled from Friday's contest. The closing disabled an ar-

contest. The closing displayed an array of plus signs by a comfortable balance, but guins were mostly fractional.

There was no news except the prover-

bial good news, to the effect that business is improving and that the country looks to be ready for any encouragement in the way of crops to start on a journey of prosperity. Bank clearings in New York city were not especially gratifying for the week, but for the country covering the six months' period to July 1 there was a gain of 8 per cent. The reinvestment of \$250,000,000 paid out on the 1st for interest and dividends found its reflection to a

in the action Saturday nothing of a feature presented itself. The foreign situation in a market sense was not

particularly reasouring, European money centers seemed to be disturbed, as indicated by a further drop in con-

sols, which brought them down to th

years. Reports from trade centers in this country were encouraging, and, so far as the present suggests, the prospects here are good. The position of the market in a speculative sense is problematical, though in general it seems to have good support on certain levels. It will require some coming action to determine its real tendency, as the week's action has been too irregular to be used as a basis of forecast.

Thousands of ladies spread the good news among their neighbors and friends.

Others write letters for publication, that suffering sisters, unknown to them, may learn about it in the newspapers.

Viburn-O-Gin is a purely vegetable compound, containing no harmful properties, is actively specific in its curative action on the womanly organs and functions,

TESTIMONIAL

"I had been a great sufferer for years before learning of Viburn-O-Gin. I had mispiacement, fainting spells, constant headache, and other female troubles, which made me feel very weak. I tried different doctors, but none gave me relief, so I took Viburn-O-Gin and it relieved me so much that I want you to spread the news of what it has done for me. It certainly will do as much for other sick women."
